Subject: MITRE Reports Not Received by GACM

Dear Ing. Tapia:

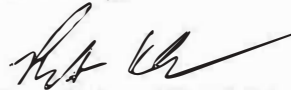

As requested, please find below a list of three documents of relevance that were developed and submitted by MITRE to Aeropuertos y Servicios Auxiliares (ASA) and/or other project stakeholders that in accordance to a list that you sent us some time ago, GACM had not ever received. Two copies of the following MITRE documents are being provided along with this letter:

- MITRE Letter F500-L14-003, dated 7 November 2013, along with an enclosure, entitled *Specifications for Automated Weather Observing Systems (for three potential airport sites in the State of Hidalgo)*
- MITRE Letter F500-L14-006, dated 10 December 2013, along with an enclosure, entitled *Alternative Runway Configurations for the Nuevo Aeropuerto Internacional de la Ciudad de México*
- MITRE Letter F500-L14-023, dated 7 April 2014, along with an enclosure entitled, *Exploratory Analysis of Potential New Airport Sites in Hidalgo - Status Report*

Please note that MITRE is not providing here minor or irrelevant documents, perhaps some of them transmitted electronically only. Also, e-mails and telephone calls, are not being provided, as that would be materially impossible, except for very specific searches. The objective pursued here is to assist you in keeping a very complete file of MITRE deliverables, and that has now largely been achieved.

Please do not hesitate to contact me if you need any clarification or assistance.

Sincerely,

Ing. Robert W. Kleinhans
Project Technical Coordinator

cc: Ing. Enrique Lavín, GACM
Dr. Bernardo Lisker, MITRE
